Welcome to WeGo™

Congratulations on the purchase of your new WeGo™ CLIP!

Included in the package are the following:

CLIP Activity Tracker

USB Charging Cable

CLIP Silicone Waist Holder

Quick Start Guide

WeGo™ CLIP User Manual

Charging Your CLIP

Please fully charge your CLIP before first use. Also, remove the plastic cling that is affixed to the CLIP's top panel.

To charge, use the included USB charger. Lift the silicone flap on side of the CLIP to expose the port and plug the smaller end of the charger into it. Now plug the other end into either a USB port on a computer or a charging station that plugs into a wall outlet (not included with your purchase of the CLIP).

The display will illuminate showing you that the device has started charging. A complete charge should take approximately 3 to 4 hours.

Once fully charged your CLIP is ready to be synced with your smartphone or tablet.

The CLIP will run for approximately 7 days once fully charged. When the device is running out of battery power, a “**LOW BATTERY**” message will appear on the display as a reminder to charge your CLIP.

Downloading and Setting Up the Join WeGo™ App

Before you can sync the CLIP to your smartphone or tablet, you must download the Join WeGo™ app in the App Store or Google Play. You can find the app by typing **“JOIN WEGO”** in the search field within the app stores.

After the app download is complete, you will be asked to log into an existing MapMyFitness account or create a new one. Below account setup, please fill in your birthday and height. Once this has been completed, there are a few more details needed before your profile is ready to go. Add a profile picture, your current weight, and gender (this will help us calculate specific data to each person and their activities).

Once setup is complete, set your goals, and start tracking a happier, healthier you!

Syncing Your CLIP

Make sure that Bluetooth is enabled on your phone before proceeding.

To initiate the sync, open the app and make sure you are in the Dashboard. If you are not in the Dashboard press the menu icon (3 solid lines) and select.

Next, press the sync icon on the top right which will open up instructions to help you properly transfer data from your device to the app.

Once completed, you will receive a “**SUCCESSFUL SYNC**” message, and the device will go back to the normal display with the app showing all updated data.

Please note: A sync should be performed before you start using your new device.

Using Your CLIP Throughout the Day

How to Wear

You can either use the CLIP with or without the silicone waist holder. When used in the holder, place the CLIP anywhere on your clothing...waist, pocket, sports bra, etc. When used without the holder, place CLIP in a pocket or pouch.

Viewing the Data

Pressing the main button will illuminate the screen. You can continue to press the button to scroll through the various metrics. Those metrics include:

Using Your CLIP Throughout the Day

How the Data is Captured

The CLIP displays activities from midnight to midnight. Each evening at 12:00am it resets to zero in order to begin capturing those activities/sleep for a new day.

Clearing the Data

Since the CLIP is designed to capture 24 hour activity, the only way to zero out the data is to do a manual reset by pressing and holding the small “**RESET**” button on the back of the unit.

Please note that this not only clears your data, but resets the device back to original factory settings.

Using Your CLIP During Sleep Sessions

How to Wear During Sleep

It is recommended to place the CLIP inside the silicone holder and clip the device on an article of clothing you wear to sleep.

Initiating the Sleep Mode

- Tap the main button once to activate the display.
- Next, hold down the main button for about 2-3 seconds and the display will show a timer and bed icon.
- Once a sleep session is successfully activated, a “**GOOD NIGHT**” message will scroll onto the screen and the display will fade out.

Waking from Sleep Mode

- Tap the main button once to activate the display. You will see the current sleep session in progress.
- Next, hold down the main button for about 2-3 seconds and a “**GOOD MORNING**” message will appear indicating your sleep session has been completed.

Frequency of Sleep Mode

- You can enter into and out of multiple sleep sessions during a 24 hour period. The CLIP device will record these and you can view the data on the Join WeGo™ app after you sync the device.

Regulatory and Safety Notices

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

1. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the product.

2. NOTE: This product has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This product generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If the product does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the product and receiver.
- Connect the product into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This digital apparatus does not exceed the Class B limits for radio noise emissions from digital apparatus as set out in the interference-causing equipment standard entitled "Digital Apparatus," ICES-003 of the Canadian Department of Communications.
